

HIGH PRECISION 3D PRINTERS

A Prodways Group Company

Dear Value Customer,

We are pleased to learn you are interested purchasing SolidScape's newest technology, the 'S series'.

SolidScape 'S' printers serve a unique niche specifically small/precise models that require high accuracy, smooth surface finish and a highly-castable material for any lost wax investment casting process unlike any other 3D printer on the market. In SolidScape's nearly 30 years of manufacturing 3D printers, the 'S' series printer is the best 3D printer we have made yet!

Recently, SolidScape has stopped the production of the 3Z printer. Although we do not intend to produce 3Z printers again the 3Z printers are NOT End of Life.

Please direct your questions to Owen Burke, Director of Sales at oburke@solidscape.com.

Thank you and kind regards,

Owen Burke
Director of Sales
